

### REMARKS

The claims of the parent application 09/921,136 were rejected under 35 U.S.C. § 102(e) as being anticipated by Kothandaraman, *et al.* (U.S. Patent No. 6,368,902 B1) and Ogawa (U.S. Patent No. 5,585,662).

However, the single new independent method claim 19 in the present application includes limitations clearly not even suggested much less taught by the Kothandaraman, *et al.* or Ogawa patents whether considered singly or in combination.

Dependent claims 2, 5, 6 and 20-25 each depend from claim 19 and add further limitations. It is respectfully submitted that these dependent claims are allowable by reason of depending from an allowable claim as well as for adding additional limitations.

In view of the above, Applicant respectfully submits that all of the claims now in the application are allowable. If the Examiner should have any questions or feel that an interview would further prosecution of this application, Applicant respectfully requests that the Examiner contact Applicant's attorney listed below.

Respectfully submitted,
